

Alliance for Water Stewardship Standard

As a local bottler, we know our business thrives when our communities thrive. We take great care in operating as a responsible corporate citizen. At the heart of our efforts is our RCCB Cares commitment, which expresses our unwavering pledge to make a positive impact in the communities where we live and work. We concentrate on areas where we can make the most meaningful difference: Community, Recycling, Energy, Fuel & Emissions, and Water.

As part of our RCCB Cares efforts in Water, RCCB is working toward the Alliance for Water Stewardship (AWS) certification at our Los Angeles, Calif., and San Leandro, Calif., facilities. The AWS standard empowers sites with a five-step framework to address site-related water challenges and manage risk. Sites are required to reach out to stakeholders to discuss shared water challenges and form relationships with the communities in which they operate.

We invite stakeholders to provide comments regarding the AWS audit on our Los Angeles and San Leandro facilities by [submitting a General Request via our Contact form](#). You can also use the form to request a list of audit team and RCCB project team members.

For further information regarding the Alliance for Water Stewardship, visit the [AWS website](#).
